

# Tuberculosis Screening St. Paul Island

Public Health Nurses will be available to provide FREE TB Screenings and testing for the St. Paul community!

## St. Paul School

February 14th 9am-12pm

## St. Paul Senior Center

February 14th & 15th 12-5pm

## St. Paul Community Health Center

February 14th - 16th 8am-5pm

February 17th 8-12pm

*Get Screened and tested!*

- If you've had contact with someone sick with tuberculosis (TB).
- If you've had a cough for a long time, night sweats, weight loss, or tiredness.
- If you've had TB before and have not been checked in over a year.
- If you have any concerns about TB.

\*Anyone that had a previous positive TB test or has been treated for TB shouldn't get a TB skin test. They should be screened for symptoms or collect sputa if it has been over a year-see our nurses for help!
